

Aisuit server

Overview

AiSuite is an open-source Python library created by Andrew Ng and his team to simplify the integration of various AI models from different providers. As of June 2025, the project's GitHub repository has garnered over 12,000 stars, reflecting its growing popularity in the AI. aisuite is a lightweight Python library that provides a unified API for working with multiple Generative AI providers. It offers a consistent interface for models from OpenAI, Anthropic, Google, Hugging Face, AWS, Cohere, Mistral, Ollama, and others—abstracting away SDK differences, authentication. Python project from Andrew Ng provides a streamlined approach to working with multiple LLM providers, addressing a significant pain point in the AI development workflow. The proliferation of large language models (LLMs) has given developers a range of choices. SourceForge is not affiliated with aisuite.
