

Are secondary distribution boxes rainproof and dustproof

Overview

Secondary distribution boxes, also known as sub-distribution boxes, generally serve specific power supply areas. These boxes have inner and outer doors, powder-coated exteriors, and are designed for safety and aesthetic appeal, with rainproof tops for outdoor work. These boxes have inner and outer doors, powder-coated. However, the outdoor environment is complex and changeable, and extreme weather, sandstorms and other phenomena often occur, which requires metal distribution boxes to have good waterproof and dustproof performance to ensure the stable operation of the power system. Built with durable materials, CE & ROHS certified. The distribution box is strictly prohibited from contacting with sharp fracture and strong corrosive medium, and of course, it is also for the safety of use. It also protects them from other bad weather. It helps you avoid short circuits or electrical fires.
