

Can a gigabit router be installed on a 200m fiber optic cable

Overview

When selecting a router for fiber optic internet, ensure it is a “fiber compatible router” with a Gigabit WAN port. The process to connect fiber optic cable to router requires careful attention to detail, but I'll walk you through every critical step with the precision and clarity you deserve. A fiber cable (drop) is run from a nearby terminal that could be either a pole or. Your router must have a Gigabit Ethernet WAN port to connect to the ONT. Some fiber internet plans can exceed 1 Gbps. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). We've recently had a new fibre connection installed, but the ISP were only willing to install the modem and fibre connection at an outbuilding we have near the edge of the property, about 200m from the house. Once you understand the basic concepts, you can check out my Recommended Equipment section toward the bottom of the.
