

Circular tube connection cable tray

Overview

These are the most corrosion-resistant tray systems we offer for routing cable and hose in configurations such as curves, slopes, and tees. Cut, bend, and connect the wire mesh trays. They are a lightweight option for organizing bundles of cable and hose while keeping them. We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. We also. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety. The Ladder Tray features light, rugged, tubular steel construction. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. Established in 1965, Channel Track has been the leading manufacturer of support systems for instrumentation tubing, wire, cable, and instrument supports. Channel Track is committed to providing quality products and service, we succeed because our customers believe in our ability to offer the best.
