

Construction of IDC Data Center in Italy

Overview

Here's what we know: 1. Massive Scale – The facility spans 193,750 sq ft (18,000 sqm) across two identical buildings, with a 13.6MW capacity designed for AI workloads. 2. Sustainable Design – Closed-loop water cooling and liquid cooling systems for AI servers protect the local. Italy's response to the global data centre boom comes with the plan recently approved by the Technical Commission for Environmental Impact Assessment of the Ministry for the Environment and Energy Security, which has given a favourable opinion on the construction of these strategic infrastructures. European firm Apto plans to build a data center campus on a 228,000 sqm (2,454,170 sq ft) site in Lacchiarella, near Milan, Italy. The company intends to invest a total of €3 billion (\$3.4bn) in the site, which will have up to 300MW of planned power capacity to support cloud and AI applications in. Retelit breaks ground on new data center in Milan, Italy Italian B2B telco operator Retelit has begun construction of a new data center in Corsico, southwest of Milan, following the land purchase from steelmaker Marcegaglia. 26 billion in 2025 and is projected to reach new heights by 2032, exhibiting a compound annual growth rate (CAGR) of 6. But the path will have to be consistent with green transition goals and focus on technology and circularity Data centres as the fulcrum of Italy's economic and digital development. According to a study by the Milan Polytechnic's Data Center Observatory, which has monitored the Italian supply chain since 2020, 23 organisations (including eight new international companies) plan to open 83 new facilities in Italy by the end of 2025.
