

Cost-effectiveness of cable tray installation in the Dominican Republic

Overview

Depending on the type of circuits and the wiring density, an installed cable tray wiring system may result in a total cost reduction (material + labor) of up to 60 percent compared to the cost of an equivalent conduit wiring system. EGS guides cable tray, conduit, and raceway manufacturers through DR free zone setup and US export channels. Galvanised steel is the most cost-effective option for most applications. The Forty-five years of operating experience has proven that cable tray wiring systems are superior to conduit system wiring systems for power, control signal and instrumentation circuits. The following functions must be properly executed to obtain a quality wiring system installation: Select the most. Ask ten buyers about cable tray cost, and most of them will point to the rate per meter. That number matters, but it's rarely the one that decides whether a project stays within budget.
