

Different voltages in Saudi Arabian power distribution boxes

Overview

The country currently utilises a dual-voltage power distribution system. In residential and light commercial buildings the Kingdom uses 127 volts, whereas 220 volts is required in for larger commercial and industrial applications. What is the mains voltage in Saudi Arabia?

Just like the rest of the Middle East, the voltage in Saudi Arabia is 230 volts, but for historical reasons, the frequency is 60 Hz, instead of 50 Hz. An ungrounded plug with plastic earth pin. Type G plugs and sockets started appearing in Britain in 1946. The Council of Ministers' Resolution No. 324 dated 20/9/1431 H was released stating the agreement on a gradual plan for changing the voltage of electricity distribution in residential and commercial areas in the Kingdom of Saudi Arabia from the present 127/220 volts to international standard. While coming to Saudi Arabia, you must be thinking about how much is the electricity voltage in the country?

Is it 110, 220, or 230?

Can you drink tap water in Saudi Arabia?

In the buildings constructed before 2012, you will find an electricity voltage of 110 / 220 V and the frequency is 60 Hz. It is however, a live working document and, from time to time, is.
