

El Salvador Integrated Power Supplier

Overview

The Energía del Pacífico integrated LNG-to-power project comprises a permanently moored FSRU, a 1.8-km subsea pipeline, a 378-megawatt natural gas-fired power plant, and a 44-km electric transmission line, connecting the power plant's output to the Central American Electrical. CHICAGO, Oct. The completion of. Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisión Hidroeléctrica del Río Lempa), the rest of the generation capacity is in private hands. DELSUR, a leading electricity distribution company in El Salvador, supplies. Our funding of Energia del Pacifico (EDP) in El Salvador—the largest private sector investment in the nation's history—will allow EDP to design, construct, and operate an integrated LNG-to-power facility in the port city of Acajutla. The country has made significant progress in expanding and diversifying its energy portfolio to improve security, reliability, and sustainability.
