

# Enterprise Core Switch Power

## Overview

Power distribution unit designed to support large, rack-mounted UniFi hardware deployments. Core switching powerhouses with speeds up to 100 Gbps and high-capacity PoE+++ output for High Availability system designs. If you're looking for the best enterprise core switches for 2026, I recommend considering options like the Cisco Catalyst 9300L with PoE+, the Cisco C9500-16X-A with dual PSUs, the M4300-12X12F managed switch, NETGEAR's 48-port managed switch, the Edge-Core 5610-52X, T-Plink's 48-port PoE solution. Up to 28 SFP+/SFP28 ports and optional QSFP28 uplinks deliver terabit-class, non-blocking throughput - perfect for spine-leaf cores or campus distribution layers. Mainframe to intermediate frame campus connectivity with 2 terabit per second of total capacity and dynamic routing, it's the perfect. With the trend of high speed Ethernet, 10/40/100Gbps, Edgecore switches offer a complete set of advanced software features that will easily satisfy the demands of enterprises and SMBs everywhere. With cost effective, high performance security switching, users are able to discover the benefits of a. The real differentiator is advanced fabric technology like EVPN-VXLAN and full support for routing protocols (BGP, OSPF, MPLS), which is essential for modern network segmentation. Automation & Management (AIOps): Evaluate the maturity of the Network Operating System (NOS), its automation APIs (for. Extreme Platform ONE™ radically simplifies complexity by unifying networking, security, and AI. We're excited to kick off 2026 with a major update to our partner program. Extreme Connect is the place to explore the real. A core switch is the backbone of a large-scale network, designed to handle massive volumes of traffic with ultra-low latency and maximum reliability.
