

Fiber Optic Cable Sheathing Process Requirements Standards

Overview

163 describes criteria for the installation of optical fibre cables defined in Recommendation ITU-T L. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. FO-VC2 JOINT USE - VERICAL MIDSPAN CLEARANCES 48. APPENDIX A - COVER SHEET / TOC 52. To meet all the mechanical, environmental and chemical resistance requirements, following are some details need to pay attention for a fiber optic cable manufacturer. The process indexes should be controlled during sheath process include: The equipment used in the sheath process is the fiber optic. Recommendations for Fiber Optic Cable Installation Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. The cable should be bent as little as possible.
