

# Fiber optic cables used in optical port switches

## Overview

Fiber optic cables are used when both high bandwidth and distance are key factors in connecting high-speed switches in data centers and other networks, and are used by telecommunications carriers in Fiber to the Home (FTTH), Fiber to the Premises (FTTP) and other. Fiber optic cables are used when both high bandwidth and distance are key factors in connecting high-speed switches in data centers and other networks, and are used by telecommunications carriers in Fiber to the Home (FTTH), Fiber to the Premises (FTTP) and other. A fiber optic connector is a mechanical device used to align and join optical fibers, enabling light to pass through with minimal loss. Unlike fiber splicing, which is permanent, connectors allow for easy connection and disconnection of cables, making them ideal for maintenance and flexibility in. Compared to Copper cables, Fiber connector types are incredibly varied. Where copper twisted pairs tend to terminate with an RJ45 plug, fiber optic connectors come in all sorts of shapes and sizes, with all manner of different use cases in mind. An optical fiber connector is used to join optical. Fiber-optic cable spans less than 15. The. Fiber optics are used in the transmission of data, and, instead of transmitting data in electrical signals, data is sent via light waves through optical fibers made of thin strands of glass or plastic.
