

Fiber optic switch n8 speed

Overview

This NanoSpeed™ switch family features ultra-low loss ($<1\text{dB}$), polarization independence, bi-directional, covering wavelength from 500nm to 2000nm, high optical power handling up to 10W, and a wide operating temperature range (-50°C to $+90^{\circ}\text{C}$). The switches are categorized into “ultra-fast” with a. VERSITRON manufactures a wide range of fiber optic switches that provide links for your 10Base, 100Base, 1000Base Gigabit, and 10 Gigabit networks simultaneously. Various port sizes are available ranging from 4 up to 52 ports. We offer solutions that provide seamless transmission and conversion. Non-latching; 1xN, 2xN, NxM; Fiber Type SM, PM; 1250 to 1670 nm; Insertion Loss 0. This is achieved using patent non-mechanical configurations with solid-state all-crystal designs, which eliminates the need for. Fiberswitch 1x2 MM is a compact and flexible fiber switch that enables switching a fiber pair between two different channels, for example between separate sources, networks (red/black), or various destinations such as an additional monitor or projector. Switching is achieved through a patented electro-optical configuration that delivers.
