

French high-speed optoelectronic connection QSFP28

Overview

This product is a transceiver module designed for 2km optical communication applications. The transmitter path incorporates an EML Driver and a cooled EML together. Among the many optical form factors, QSFP28 (Quad Small Form Factor Pluggable 28) has emerged as the industry workhorse for 100 Gigabit Ethernet (100GbE) networks. Originally defined under the SFF-8665 specification by the Small Form Factor (SFF) Committee, the QSFP28 standard revolutionized how. This guide provides the definitive roadmap for selecting, deploying, and troubleshooting QSFP28 transceivers while bypassing the painful trial-and-error phase. By providing four lanes of 25G, QSFP28 enables a streamlined upgrade path from lower-speed networks, making it a popular choice for scaling data center interconnect (DCI) and.
