

# How to connect the MPO s LC connector

## Overview

The connection between the MPO trunk fiber patch cord and the LC duplex fiber patch cord, it need to use the fiber adapter panel, the MPO trunk fiber patch cord, and the MPO-LC duplex fiber distribution box. This connection method allows device replacement at. How to connect the MPO optical module with LC optical module?

At present, there are usually two types of optical modules in the market, MPO and LC. For two optical modules with the same interface, MPO patch cord or LC patch cord can basically realize the connection between them. In the current era of network technology, the question arises: how are optical transceiver modules within data. Generally, the MPO cables and connectors can be utilized in 3 ways which are MPO/MTP adaptors, MTP/MPO-LC Cassette, MTP-LC Breakout Patch Panel, Transceivers With MTP/MPO Interface, MPO/MTP breakout cables are an exception for this methods.
