

How to turn off the power to the elevator distribution box

Overview

Shut off the power to the elevator at the main breaker box. Most breaker boxes allow you to selectively turn off power. Power can be cut to the main system while leaving. Siemens Elevator Control Switch (ECS) is designed to interrupt incoming AC power upon receiving a signal from a Fire Alarm Control Panel (FACP) for both cable and hydraulic elevators. Stop switch - When activated, this switch stops the elevator and sounds its emergency signal. [Note: If your elevator is equipped with automatic on/off light feature, the car light will turn on automatically when you open the landing door and turn off automatically once the preset A17. 1. ↗ Quick but powerful look at wiring an elevator disconnect for both 220V power and 120V control circuits! Learn how to size, wire, and connect safely according to Canadian Electrical Code (OESC) st. Additionally, it includes a shunt trip disconnect, relays to receive FACP signal and monitor shunt trip.
