

# Industrial switches are all Ethernet ports

## Overview

Industrial switch, also known as industrial Ethernet switch, is a piece of network technology designed specifically for use in industrial plants. It provides reliable, high-speed data transmission of industrial networks, including 10G industrial switches for faster speeds. Built for space-constrained locations and machine integrations, these compact and secure switches offer full GE ports, flexible port configurations, high-wattage PoE options. PoE+ Ethernet switch, 8 Ethernet ports in M12 format, automatic detection of the data transmission speed of 10/100/1000 Mbps, jumbo frames up to 9600 bytes, coupling of network segments with different transmission speeds, autocrossing function, degree of protection IP67 Narrow Ethernet switch, five. WAGO's switch portfolio provides scalable Ethernet network infrastructure with excellent electrical and mechanical performance. These switches come in two types, managed and unmanaged offer Gigabit, and PoE capabilities with various industry certifications. Physical layer interfaces include 8 x RJ45 10/100/1000 Ethernet ports, capable of providing up to 30W of PoE+ to PoE+ enabled end-points and two Gigabit SFP+ slots that can be used for fiber trunk connections. Patton's FP2008E/AB is a 12-port industrial gigabit PoE++ managed Ethernet switch.
