

# Internet companies are transforming into new energy companies

## Overview

The landscape of energy production in the United States is undergoing a transformation, driven by an unexpected powerhouse: Big Tech. In a robust dance of technology and energy, major companies like Amazon, Google, Apple, and Microsoft find themselves amid a. nsition is top of mind for today's utility and energy leaders. The challenges associated with it are manifold: utility and energy companies will need to manage decentralized power generation and demands for decarb nization while meeting rising expectations for customer service. This transition will provide new opportunities and challenges for investment and growth for both domestic and international players. Energy stakeholders have recognised that. This digital transformation in the energy industry is driven by the integration of renewable energy sources, the development of sustainable electric grids, and the innovative use of battery storage systems.
