

Introduction to Intelligent Power Distribution Cabinets

Overview

An Intelligent Power Distribution Unit (iPDU), also known as a Smart PDU or Intelligent PDU, is a critical component in modern data center infrastructure. iPDUs serve as a centralized power management solution that enhances the efficiency, reliability, and monitoring capabilities. Overview: PLS-DP series of intelligent precision power distribution Cabinet series products include: power, UPS input, output, counter, three varieties of Cabinet. It is not just a distribution Cabinet, power inputs, outputs, power monitoring system as a whole set of integrated power distribution. Modern IT equipment uses A/B redundant power inputs. Traditional systems measure them separately—creating inaccurate data. Their design must achieve an optimal balance between reliability, practicality, and economy.
