

Managed Switch Aggregation

Overview

They support link aggregation protocols such as Link Aggregation Control Protocol (LACP) and Static Link Aggregation, which allow multiple physical links to be combined into a single logical connection. This enhances bandwidth, redundancy, and ensures failover capability in. Provides 1G, 2.5G, and 10G speeds for flexible customization, ensuring optimal performance, compatibility, and scalability. Flexible interface options like copper, fiber, and PoE ensure seamless integration and cost-effective deployment. Supports stacking for easier management, improved redundancy. An 8-port, Layer 2 switch made for 10G SFP+ connections. Faster replacement and priority support, covered for 5 years. High-performance 10G SFP modules for optimal connectivity. By bundling multiple network connections into a single high-bandwidth link, aggregation switches help. Learn more about the highlights and compatible accessories of the Meraki MS450-12 aggregation switch. With features such as Static Routing, DHCP Server, ACL, IGMP Snooping, STP, LAG, and centralized cloud management, they offer a robust and reliable solution for the aggregation layer of SMB networks.
