

One-meter cable tray support

Overview

These tray systems allow excellent ventilation and prevent sagging while routing. They support up to 280 lbs. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng- ience and safety. es in the industrial environment. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. The MKS and SKS cable tray systems from OBO Bet- termann have a long tradition. For 45 years, the ro- bust systems, which have been tested for various areas of application, have been successfully em- ployed by planners and specialists in the field of elec- trical installations. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore.
