

# Outdoor security monitoring power distribution box

## Overview

A high-capacity weather-sealed field enclosure designed to house electrical and network components in outdoor surveillance, access control, or industrial monitoring systems. Its rectangular ABS structure allows convenient mounting of DIN rail components, PoE switches, backup power. To this end, Rittal offers you a portfolio of secure and robust outdoor enclosures, together with matching climate control systems, for optimum protection of your installations. A modular system of standard products permits configuration of an individual solution. Featuring IP65 waterproof enclosures, modular DIN-rail design, and fire-resistant metal casing. Compatible with smart monitoring systems for real-time load tracking. A CCTV power supply box, also known as a power distribution box, allows surveillance system installers to easily manage the power to multiple CCTV cameras at a central point (usually at the location of the DVR). This allows your camera installation to be neater.
