

# PoE Switch Access Monitoring

## Overview

Use Automated switch port mapping, PoE management, Configuration management, and pre-configured SNMP templates to monitor your switches, firewalls, and access points. The Catalyst Center Power over Ethernet (PoE) enables you to monitor the PoE-capable devices in your network. It also monitors the power summary of switches supplying PoE, which provides information such as a switch's power budget, used power, remaining power, and power usage. AXIS D8248 Managed PoE++ Switch is made for the surveillance industry and a perfect complement to Axis. With a centralized and easy-to-use interface, Domotz simplifies network monitoring and provides MSPs and IT professionals with powerful software to increase operational efficiency. Use Domotz to proactively monitor your switch port availability, health, and performance with our built-in features.
