

Post-disaster fiber optic cable repair

Overview

If your fibre optic cabling is broken or has developed an intermittent fault, please call on 01270 212211 to arrange a fast response optical fibre repair engineer for a same day call out. Once an accident happens, there are two major problems: restoring service to the cable and doing it quickly to minimize the impact on customers. However, that is. With predictable disaster preparation and recovery procedures, including those for rebuilding fiber-based communications networks can be developed and practiced well in advance. The good news is that passive fiber is usually rugged and damage-resistant. In some cases, it can even be submerged. Using the latest in OTDR test equipment our fibre optic repair engineers will identify a cable fault within a distance of 1.
