

Recommended Protective Film for Distribution Boxes

Overview

Shrink film is the best protective packaging for boxes. Then, stretch film is used but these two materials reach their limits during long-term storage, transport or with significant handling. This is where shrink-wrap comes in handy, by providing a protective, watertight “film” over the product during periods where there is an element of risk, such as. Packaging films are thin plastic or polymer sheets used to wrap or contain products for protection, preservation, display, or distribution. They serve as a barrier to lock in moisture, oxygen, dust, and other environmental factors while also enabling branding and labeling. It's a versatile solution widely used across industrial, food, pharmaceutical, and logistics sectors. Thanks to its light weight, strength, and ability to conform to. Our protective films are high-quality co-extruded films made from polyethylene.
