

Router upgraded from 100M fiber optic to 200M

Overview

For most homes up to 200 m² (or with open layouts where signal must travel ~20-30 meters linearly), a dual-band Gigabit router like the TP-Link EC220-G5 or Intelbras W5 AC1200 is sufficient. If you need reliable Wi-Fi coverage across 200 meters—especially outdoors or between buildings—a dedicated outdoor wireless access point (AP) or CPE is almost always the right choice. Over the past year, demand for true 200-meter range routers has grown steadily among rural homeowners, farm. The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. If you're using a single-band or sub-Gigabit router with a 200 Mbps plan, you're likely bottlenecked—not by your. We're looking to upgrade from a 100 Mbps to a 200 Mbps fiber connection. The sales guy says that a new fiber line will need to be run. So then provider install their modem outside your house and the distance is up to 200m. What type of fiber are you guys using for 100Gb runs (200m)?

Looking to run some fiber for a link inside a building, and realistically 40Gb or a few 10Gb would be fine, but.
