

# Selection of air switch for distribution box

## Overview

1, the general switch of the household distribution box can generally choose double-pole 32-63A small air switch or isolation switch. It is called an air break switch because it makes use of air as the dielectric medium to suppress the electric arc produced during the closing and opening of the switch. Air break switches are. This range of 6 switch boxes AF-SB is compact and easy to install with only 195 mm for the smallest model, for all others only 250 mm installation height. Up to 8 indoor units can be connected to one port. An air switch can be. s available in the motor operator version for AM switch-disc o erating mechanism is normally installed in AM/Y swi n t alter within a range of ambient temperatures from  $-5^{\circ}\text{C}$  to  $+ f$  e generation of a blast of compressed air releas or, in the open position, the moving contacts are auto ated in. From controlled environments of a data center to the demanding continuity of the power grid.
