

Should outdoor cables be placed in cable trays or ladder racks

Overview

In most cases cable ladders are the preferred choice, however; cable trays are better suited when aesthetics and radio/electromagnetic interference are important considerations. Cable trays are also useful for protecting sensitive cabling and tubing. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. A cable ladder, also known as a ladder cable tray, is a support system that consists of two longitudinal side rails connected by individual rungs. These rungs are spaced at regular intervals and provide a structure that resembles a ladder—hence the name. Alternative names include: cable runway and. When it comes to outdoor projects, ladder type cable trays are one of the best options available as they are very useful in rough outdoor environments.

Article Content

Reliable Solutions for Efficient custom ladder type cable tray ...
