

Silver connector in distribution box

Overview

6mm contact pitch, Sliver connectors are super slim, allowing designers to fit more inside the box. An active latch on the housing provides additional connection security. TE Sliver connectors serve many applications, data rates, and protocols (PCI Express, SAS, and Ethernet). 6mm contact. Due to the latest high speed demands in networking equipment TE Connectivity (TE) has developed the new Sliver internal cabled interconnect which provides one of the most flexible solutions in the market for making internal I/O connections on the board. Thanks to the status indicator, you have an overview of a large number of signals. 99% Pure Silver cabled multiple-output alu case, with silver power connectors and ferrite core (s) After introducing our Solid Silver mains cables, the next logical step was to use them in our Distribution Block configuration (originally developed for use with our PowerBlack range of. The visible discoloration of a metallic surface is generally known as “tarnishing”. In the case of silver, this is down to the formation of a layer of silver sulfide (where silver combines with the sulfur in the air) that is characterized by a discoloration ranging from light yellow to a strong.
