

What is a China Unicom GPON device

Overview

As the latest gpon universal fiber optic modem (ont) from our 25-year legacy, the public version 8540, 8340, 8240f, and 8346m are widely deployed by china unicom, china mobile, and china telecom – the three major telecommunications operators in china. These four devices all. A China GPON ONU terminal device refers to an optical endpoint installed at customer premises that converts fiber-optic signals into usable Ethernet connections. To make this network build a reality, the service provider is going to leverage Alcatel-Lucent's (NYSE: ALU) GPON equipment, including its 7360 Intelligent Services Access. China Unicom Europe is a wholly-owned telecom company, a subsidiary of China Unicom Global Limited established in the UK in 2006. If you've purchased this device and don't know where to start, don't worry.
