

# Where is Founder Technology s AI server located

## Overview

This massive AI supercomputer, featuring over 100,000 NVIDIA HGX H100 GPUs, exabytes of storage, and lightning-fast networking, costs billions of dollars and is based in Memphis, TN. Google opened a Google Cloud data center in Nanau, Germany in 2023. Arne Dedert/picture alliance via Getty Images As the race for AI dominance continues, companies like Google, Meta, OpenAI, Microsoft and now Elon Musk's xAI are investing more money, time and resources into securing and. Elon Musk's companies - Tesla, X Corp (Twitter), and xAI - are developing and operating data centers worldwide. Key locations for these facilities include Austin, Texas; Sparks, Nevada; several sites in California; Atlanta, Georgia; Hillsboro, Oregon; Memphis, Tennessee; and Shanghai, China. Even more remarkable, this entire data facility was transformed from the ground up into a production-grade AI. These data centers are strategically located around the globe to meet the rising demand for technological advancements. Some major hubs are in the United States, such as Northern Virginia and Silicon Valley, which are well-known for their concentration of tech companies and infrastructure. Where is Founder Technology Group Co. 's stock symbol?

How many employees. Founder Technology Group reported significant financial growth in 2025, with operating income reaching RMB 4,939,258,449. Net profit attributable to shareholders rose to RMB 472,197,764.
